

## PERMANENT MAGNET

## FULL OF MAGENTIC PULL

## The permanent magnet is installed at the front of the sweeper and can be raised and lowered hydraulically.

It is particularly suitable for use on runways to pick up any form of metal parts that pose a danger to flight operations during the sweeping operation.

## **N.B.:** Chassis preparation is required for this additional equipment.

Technical modifications reserved. All information without guarantee. Product photos may contain additional equipment.
